

# Phosphate Buffered Saline, pH 7.4 10X

**Product Code: TL1099**

## Product Description :

All media used in tissue culture have a basis of a synthetic mixture of inorganic salts known as a physiological or balanced salt solution (BSS). All the physiological salt solutions have been derived from the salt solution originally described by Sydney Ringer (1885). The first balanced salt solution to be developed specifically for supporting the metabolism of mammalian cells was Tyrode's solution. Since then many modifications have been done to obtain better buffering salt solutions and to prevent calcium precipitation.

The function of a salt solution is:

- To maintain the medium within physiological pH range (7.2 - 7.6).
- To maintain intracellular and extra cellular osmotic balance.
- Modified with a carbohydrate, such as glucose serves as an energy source for cell metabolism.

TL1099 is 10X Phosphate Buffered Saline, pH 7.4. It is most commonly used for tissue disaggregation and monolayer dispersal since presence of calcium and magnesium ions may hinder the trypsin activity. It is also used for routine immunohistochemical testing and as a general purpose solution for washing cells in various hematological and molecular biology procedures.

## Composition :

Ingredients	mg/L
<b>INORGANIC SALTS</b>	
Disodium hydrogen phosphate anhydrous	7950.000
Potassium dihydrogen phosphate	1440.000
Sodium chloride	90000.000

## Disclaimer :

User must ensure suitability of the product(s) in their application prior to use. Products conform solely to the information contained in this and other related HiMedia™ Publications. The information contained in this publication is based on our research and development work and is to the best of our knowledge true and accurate. HiMedia™ Laboratories Pvt Ltd reserves the right to make changes to specifications and information related to the products at any time. Products are not intended for human or animal diagnostic or therapeutic use but for laboratory, research or further manufacturing use only, unless otherwise specified. Statements contained herein should not be considered as a warranty of any kind, expressed or implied, and no liability is accepted for infringement of any patents.

## Quality Control:

### Appearance

Colorless, clear solution.

### pH at 10X

6.70 -7.00

### pH at 1X

7.20 -7.60

### Sterility

No bacterial or fungal growth is observed after 14 days of incubation, as per USP specification.

### Cultural Response

No lysis of cells in 24 - 48 hours.

### Endotoxin Content

NMT 5EU/ml

## Storage and Shelf Life:

Store at 15- 30°C away from bright light.

Shelf life is 24 months.

Use before expiry date given on the product label.
